

# CSS Training

CSS ~ Annual Meeting: 08/11 - 13/2010

## **SEQUEL TRAINING PROVIDED AT THE ANNUAL MEETING**

At our Annual Meeting in August, an in-depth presentation of SEQUEL will be provided by Floyd DelMuro, senior consultant for data access technologies at Help Systems. There will be a hands-on lab as well. Be sure to attend. This will be a great opportunity to absorb all the details on how to modify and run SEQUEL views and reports. ~ Randy Dvorak, Training Manager

CSS ~ Event, Des Moines, IA, 05.26 - 27.2010

## **SEQUEL TRAINING HOSTED AT CSS OFFICE**

On May 26th & 27th, CSS hosted a SEQUEL training class for current owners of the product. Steve Spieler of [Help Systems, LLC](#), provided the training. The primary focus of session was learning how to work with Views, Reports, and Dashboards (visual views of managerial information).

"With every corner I turn in working with SEQUEL, I am absolutely impressed with the product's power and capability." ~ Randy Dvorak, Training Manager

CSS ~ Reminder, Des Moines, IA, 05.15.2010

## **SEQUEL - THE INFORMATION YOU NEED, WHEN YOU NEED IT**

CSS is working with [Help Systems Software](#) to use SEQUEL™ to get customized data from CONTROL®. Recently, we held a WebEx session that our Membership could view to demonstrate what the SEQUEL™ product can achieve.

For example, we have built reports with the ability to drill-down from Region to Location and from Location to Commodity/Customer. We can assist you with creating queries and reports. ~ Randy Dvorak, Training Manager

CSS ~ Reminder, Des Moines, IA, 05.01.2010

## **CSS TRAINING - LASTING BENEFITS**

Everyone benefits when they can review outstanding issues and share ideas on how to work with the system.

CSS can arrange training sessions that use your data and is relevant to your business policies. We can assist you in full or half day sessions at the CSS office, through Sametime on the web, or at your site.

CSS offers many training options. If any of the following interest you, please contact CSS to schedule training time.

### **NEW USER ORIENTATION**

CSS can assist you when you have merged companies or have new employees who need training on daily tasks.

### **TRAIN THE TRAINER**

CSS can provide a learning environment specific to your business practices to assist your Trainers in getting the most out of the system.

### **PUT YOURSELF IN CONTROL**

CSS can provide training sessions at the CSS office, regionally, or at your site to review those areas of the system where you would like in-depth examples to ensure you are taking full advantage of the system's capabilities. For example, CSS can provide beginning and advanced classes in SQL or review Petroleum, Inventory, and Formulas.

### **NOTE ON SEQUEL**

The Sequel ViewPoint® product provides data quickly and efficiently in a graphical format just right for management reports. Sequel is more than a query and reporting tool, it provides real-time data access for analysis.

Our Customers will find it a cost effective method for organizing and presenting information.

### **SEASONAL REFRESHERS**

CSS can provide spring and fall refreshers for those tasks that you do only once a year and would like to review to make sure you are performing tasks in the most effective way and that you understand how to change setup flags to reflect your business practices.
